BatteryStuff Part #: **DPPS2**

Another BatteryStuff favorite. Built with pride in the USA, these are one of our most well made, durable lines of Chargers!

## Dual Pro 12v 24v 30 Amp Waterproof Marine On-Board Charger DPPS2

### Product Description

The Pro Series is a top of the line 15 amps per bank charger. Microprocessor controlled independent outputs offer very quick recharge and dependable long-term storage. Dual Pro Battery Chargers incorporate important features such as being fully waterproof, completely automatic, overcharge protected, temperature compensating, and ignition protected. They also have LED readouts, and are USCG approved. Can be utilized for 24-volt series system or dual 12-volt batteries, either independent or in parallel configuration. Will not work on single 24 volt battery such as aircraft design batteries.

Can be utilized for 24-volt series system or dual 12-volt batteries in parallel configuration where rugged waterproof charger construction is needed. There are no mounting restrictions requirements with Dual Pro Chargers. Use with Flooded Wet Cell or AGM batteries, special order at no extra charge for true Gel Cell batteries.
